Adopted June 30, 2015

7100 - **FACILITIES PLANNING**

The Board of Education is committed to ensuring that Learning Environments are student – centered, efficient and stable and also recognizes that planning must be grounded on accurate data. In order to assure that future District construction supports the educational program and responds to community needs, the Board will prepare a Facilities Master Plan and will revise that plan periodically thereafter. The plan shall include a thorough description and analysis of local and regional demographic factors which influence general population growth and public school enrollments.

In order to apprise the Board of the continuing relevance of the Board's Facilities Master Plan, the Superintendent shall monitor District enrollment and building usage, capacity, and conditions. A plan for building usage shall be developed and updated by the superintendent at least every three years. A report to the Board including such matters as usage and capacity, state of repair, enrollment over the last three year period and future enrollment trends shall be included in the report.

In planning for the enlargement or modification of its facilities, the Board shall consider not only the number of children whose educational needs must be met, but also the physical requirements of the program it deems best suited to meet those needs. The District shall provide suitable accommodations to carry out the educational program of the school including provision for the disabled, pursuant to law and regulation.

Effective 7/1/15
