A Day at the Fort:

Year 1: Lessons and demos on new techniques, working in labs creating and editing images, looking at and critiquing student work.

Year 2: Lessons and demos on new techniques, working in labs creating and editing images, looking at and critiquing student work, preparing portfolios for scholarships and competitions, preparing for Adobe Certification exams, internships.

About Us:

The Photography digital lab, studio and darkroom are located on the beautiful Fort Hayes campus. Students get a foundation in camera functions, lighting and digital editing in preparation for careers in photography. Interested students must submit 8-10 of their best photos to cwitt@columbus.k12.oh.us to complete their application.

Things You'll Do:

Students learn how to better use their cameras, improve their images through editing in Adobe Lightroom, manipulate light to create effects, and create layouts and collages in Adobe Photoshop. Students design personal projects based on their specific interests in photography and then create websites to showcase their work. They have portfolio reviews with college recruiters and compete in several state and national art competitions.
