

# Classroom Technology Grant Program

## In-Kind Grants to USA School Districts for the Installation of AV Technology

**GrantWatch ID#:** 160902

**Agency Type:** Foundation / Corporation

**Funding Source:** Extron Electronics

**Deadline:** Ongoing

**Conf. Date:** 00/00/00

**Description:** In-kind grants to USA school districts for the installation of advanced AV technology solutions in classrooms. Funding is intended to promote the expansion and increased visibility of AV technology in order to evaluate these technologies and define standards for AV systems.

The following grant programs are available:

- Classroom AV - provides an easy-to-use classroom AV switching, control, and audio amplification system.
- VoiceLift Microphone - allows classrooms to experience the benefits of voice amplification.
- ShareLink - enables schools to test wireless collaboration and presentation capabilities.
- GlobalViewer Enterprise - demonstrates the benefits of managing, monitoring, and controlling AV devices over the network. Grant location should have more than 35 Extron IP Link enabled controllers on the network.

Each grant award includes installation of Extron classroom system technology, along with complete training.

Once the grant has been awarded, an authorized Extron integrator will contact you to review the details of the system and schedule installation and training. From that point forward, you will have all the time you need to evaluate the system and its impact on teachers and students. All equipment, installation, and training are provided free of charge, with no required commitment for future purchases.

The district is responsible for providing the following:

- A projector or display with an RS-232 port
- Electrical service to the projector/display and Classroom System
- Network drop to the location where the controller will be installed

Extron does not supply a projector and will not install the electrical. A site survey will be completed prior to installation to ensure a quick and seamless installation of the classroom system.

Depending on the makeup of your classroom, the installation can take 4 to 6 hours to complete. Extron can coordinate installs to take place after school if needed.

**Full Description:**

**Eligibility:**

- See RFP and/or Grant Guidelines for full eligibility

**Additional Eligibility Criteria:**

Grants are available to US school districts.

**Pre-Application Information:** Apply by submitting your email on the URL for Full Text page below and completing the application. Once your information has been submitted, an Extron Grant Administrator will be in touch to discuss your project.

You will receive confirmation of your grant submission within 10 days. Approval will be determined within 3 weeks.

**Contact Information:** Before starting your grant application, please review the funding source's website listed below for updates/changes/addendums/conferences/LOIs. See the URL for Full Text link below to begin the application process.
