A physically literate individual demonstrates competency in a variety of motor skills and movement patterns.

**Benchmark

Demonstrate movement skills and patterns in a variety of individual performance activities and lifetime physical activities.

**Grade Band: 6-8****Options:** Choose one or more of the following:

- |    |   |
|----|---|
| 1. | <a href="#">Movement patterns in fitness</a>                                      |
| 2. | <a href="#">Specialized locomotor skills in individual performance activities</a> |

**\*If more than one is chosen, they can be averaged for a final rating in 1A.****Option 1: Movement patterns in fitness**

**Task:** Students will demonstrate at least five essential fitness skills. The rubric provides space for the teacher or student to identify the skills or patterns to be demonstrated within the sequence. The teacher must determine fitness skills or patterns that are considered essential (examples may include: push-ups; sit-ups; planks; bench dips; wall sits; or yoga, including child pose, mountain pose, warrior pose or downward dog).

<b>Proficient 2</b>	Demonstrates at least three essential fitness skills or patterns with correct technique.
<b>Limited 1</b>	Struggles to demonstrate correct technique for fewer than three fitness skills or patterns.

## ANALYTIC RUBRIC EXAMPLE TEMPLATE:

For each fitness skill identified, it may be necessary for teachers to add critical elements to the rubric that align to the identified skill.

## Option 2: Specialized locomotor skills in individual performance activities

**Task:** Students will demonstrate correct technique of at least five basic skills from an individual performance and/or lifetime activities. The skills or patterns can be teacher-selected or student-selected. The teacher must identify the skills or patterns that are advanced or basic. The skills or activity selected also might require the teacher to identify the “practice” or authentic environments. The rubric provides space for the teacher or student to identify the steps or patterns to be demonstrated within the sequence.

\*Individual performance activities might include gymnastics, figure skating, track and field, inline skating, wrestling, self-defense, swimming, snowboarding, skiing, rock climbing, mountain biking and skateboarding. (Please note: archery, golf, bowling, etc., are target games and badminton, tennis, etc., are net/wall games. All are Standard 1 Benchmark B skills and are NOT to be assessed as Benchmark A.)

**Ohio Physical Education Assessments****Standard  
2**

Applies knowledge of concepts, principles, strategies and tactics related to movement and performance.

**Benchmark  
A**

Apply tactical concepts and performance principles in game-like settings.

**Grade Band: 6-8****Assessment Task – Game Performance Observation**

**Instructions:** Observe students on multiple occasions in game-performance settings. These settings should be small-sided to allow for student involvement in game play and opportunities for the teacher to observe performances. Examples of small-sided games might include 6v6 soccer or 3v3 basketball. Focus specifically on the level of understanding students show in terms of decision-making with the ball, creation/use of space and defense of space.

This assessment requires instruction in invasion games, since these provide the best opportunity for students to be actively involved and to demonstrate understanding of game-performance concepts. This is especially the case for game components such as decision-making (where there are lots of options for players with the ball), use of space (invasion games played through 360 degrees), and defending (which players do for about 50 percent of game time). Use the criteria on the next page to evaluate student performance.

<b>Proficient 2</b>	Usually chooses best options in game play: <ul style="list-style-type: none"> <li>• Attack and shoot where possible</li> <li>• Pass to teammate who can attack</li> <li>• Play a possession pass</li> <li>• Dribble to reposition</li> </ul>	Usually moves to spaces where passes can be received when teammates have the ball	Usually moves to mark or guard opponents, to deny space and prevent opponents from attacking and scoring

Grade Band: 6-8

**Assessment Task – Individual Project**

**Instructions:** Students can communicate this information via a **written paper, video or orally to the teacher**. The skill chosen should be based on an activity of their choosing, possibly selected from sports, games, fitness, gymnastics, dance, outdoor activities, track and field, aquatics or other activity areas.

**Projects should include the following components:**

2. Description of common errors in performance of the necessary skills, referencing biomechanical principles. Examples related to errors include:
  - a. **Body position** – Are there errors in ready position sometimes?
  - b. **Contact or release point** –Is the ball thrown or hit at the correct point relative to the body?
  - c. **Release or take-off angle** –Is the ball thrown at the correct angle or the body take-off at the correct angle?
  - d. **Balance/over-balance point** –Are performers able to hold their balance correctly?
  - e. **Rotation** –Does the body rotate enough to generate force?
3. Develop a plan to improve movement performance using the appropriate movement principles, critical elements, drills and biomechanical principles.

Level	Criteria
<b>Advanced 3</b>	The project contains a complete list of critical elements needed in the preparation, execution and follow-through phases of movement. Common errors are described in detail with reference to biomechanical principles. The plan includes elements to improve the skill that applies biomechanical principles in specific and appropriate drills, critical elements (cues) or movement principles.
<b>Proficient 2</b>	The project identifies appropriate critical elements needed to improve the skill. Common errors are described with reference to biomechanical principles. The plan includes elements to improve the skill using drills, critical elements (cues) or movement principles.

\*If the student properly used technology to complete the physical activity log in 3A, the student would be determined advanced for the technology rubric and does not need to complete section 2.

**Benchmark B score = Average of all five sections.**

Remember these should be “healthy choices” for calorie balance, nutrient density and appropriate for exercise and physical activity.

Make the “best” choice from those provided for each question:

1. You are going for a three-mile run or a long-distance (30 minute) bike ride today. Choose a meal to eat from the list below:

3. **D** A banana is the healthiest snack option that will help provide energy.
4. **A** Water provides you with the best means of hydration without additional calories.
5. **A** Water provides you with the best means of hydration without additional calories.

## Ohio Physical Education Assessments

<b>Standard 4</b>	Exhibits responsible personal behavior and social behavior that respects self and others in physical activity settings.
<b>Benchmark A</b>	Develops and applies rules, safe practices and procedures in physical activity settings.
<b>Benchmark B</b>	Communicates effectively with others to promote respect and conflict resolution in physical activity settings.
<b>Grade Band: 6-8</b>	

**Task:** The following rubric can be used as a formative assessment over the course of a number of different games or contexts. If assessed in multiple settings or times throughout the grade band, determine an average rating for each benchmark.

**Directions:** Observe student behavior in an activity that would allow the student to demonstrate the categories listed in the rubric. Provide one rating for each category. Calculate an average for each category for a score for each benchmark. (Note: A student's responsibility for proper attire during physical education class is not included in the standards or this assessment.)
