Date: September 24, 2021
Subject: Supply Chain Disruptions

As most are aware, due to the global pandemic, all businesses are facing supply chain issues at a level that they have never seen before. This is also true within the Office of Food Service at Columbus City Schools. Due to this very fluid environment, we have been forced to make an unprecedented amount of menu changes. We expect this will continue into the foreseeable future.

Rest assured that as always, we continue to be committed to providing nutritious and tasty meals for your students. We are also committed to providing choices for them on a daily basis. Our meals continue to follow National School Lunch Program and School Breakfast Program requirements as outlined by the USDA. We understand that a well-nourished child is better prepared to learn in the classroom.

Thank you for your understanding through these challenging times.
