Khan Academy (Click Continue with Google)	https://www.khanacademy.org/
Smithsonian Open Access	https://www.si.edu/openaccess
Information Literacy Spotlight Video (Columbus Metropolitan Library)	https://youtu.be/h5NvbgY1MWY Ten-minute video presenters discuss various forms of information that teens encounter in the world and ways to evaluate them. https://teenupload.columbuslibrary.org/ Students create Clickbait news headlines or product advertisements as a follow-up project to demonstrate learning.
StudySync Library	Students in English 6-12 have access to a robust library of texts inside the StudySync library that are not included in their CORE ELA Units. Students can choose to read texts included in the library. Students can access StudySync via Clever.
Vocabulary Games/Study	Students in grades 6-12 can access VocabularyRoots.com (https://www.vocabularyroots.com/home/) or Vocabulary.com (https://www.vocabulary.com/) to practice work with morphology or vocabulary. Accounts are free but may require creating an account.
Achieve3000	Students grades 6-9; Sign-in through CLEVER; Competitions have begun between schools to win trophy for most Lexile level growth in November. Activities with scores of 75% or more will help your school.
ALEKS Math	All students in grades 6-12 have access to ALEKS for each of their math classes. Students learn concepts by working through their course on their own path. Students access ALEKS through Clever.

Hooda Math	https://www.hoodamath.com/ Free online math games and puzzles for grades 6-12. Practice solving equations, ratios, proportions, factors, graphing lines, and transformations.
Pic -Lit	https://piclits.com/sample-pic-lits/ Students can practice daily writing on this free literacy website that uses photography for creative, grammar-controlled writing. Students choose photographs to write about. They need to register to save writing collections.

Resources for Specialized Populations Grades K-12

Students with Special Needs

Vizzle Platform: Vizzle provides comparable Tier 1 curriculum for students with disabilities online. Vizzle has the ability to provide differentiated access to standards based, grade level instruction with differentiated access levels by course or standard.

Vizzle provides 3 levels of access (examples provided below):

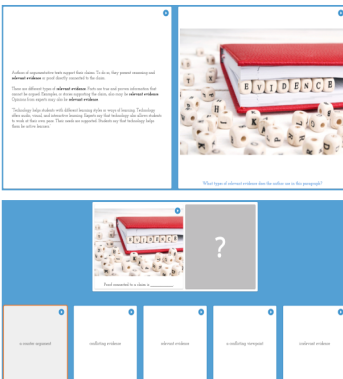

- Level 1 higher level text and comprehension questions with no visual cues
- Level 2 with modified text with some visual cues
- Level 3 minimal texts and visual cues

LEVEL 1

Higher level text and comprehension questions without visual cues; curriculum has a field of 5 for grade 3 and up or a field of 4 for K-2.

vizzle
a rethink ED product

Genres/Informational - Argumentative Text - Instructional Text/Match - L1 (ELA - Grade 8)

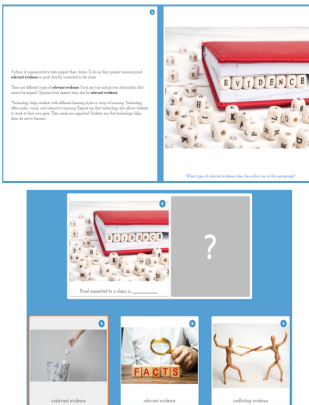

LEVEL 2

Modified text with visual cues; curriculum has a field of 3 choices with related image.

vizzle
a rethink ED product

Genres/Informational - Argumentative Text - Instructional Text/Match - L2 (ELA - Grade 8)

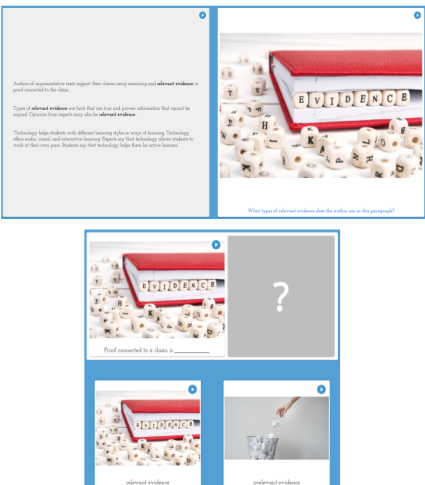

LEVEL 3

Minimal text with visual cues; curriculum has a field of 2 choices with identical image.

vizzle
a rethink ED product

Genres/Informational - Argumentative Text - Instructional Text/Match - L3 (ELA - Grade 8)

Vizzle is also driven through Clever and has the ability to provide pre-assigned lessons based on the students course enrollment or grade level.

Vizzle has over 40,000 activities with modifications for pre-k- 12, including transitions activities. Lessons can be personalized based on individual student needs and preferences.

Lastly, Vizzle has the capability of auto-data collection to provide instructional support staff, classroom teachers, building administrators, and district personnel.

For more information and step by step:

English Language Learners

Rosetta Stone

Rosetta Stone a language learning program that focuses on helping language learners thrive in real-world conversations. Through contextualized practice and feedback, Rosetta Stone encourages learners to begin speaking the language from the very first lesson.

- Grades (K-1) [Use CCS log-in](#)
- Grades (2-5) [Use CCS log-in](#)
- Grades (6-12) [Use CCS log-in](#)

ST Math

ST Math is a web-based math program that teaches math concepts from every grade level curriculum solely through visual representation. With visual learning, students are better equipped to tackle unfamiliar math problems, recognize patterns, and build conceptual understanding. Without language barriers, the problem is accessible to all students, regardless of skill level or language background.

- Grades (K-1) [ST Math Link](#)
- Grades (2-5) [ST Math Link](#)
- Grades (6-8) [ST Math Link](#)

IXL for EL's

IXL is a personalized learning platform. IXL's instructional resources expand learning opportunities for students. From engaging video tutorials to step-by-step problem explanations, and more. With each question answered, students, move up and down through the levels based on their performance, ensuring they're always challenged at the right level.

- Grades (6-12) [Use CCS log-in](#)

Resources for ESL Families

- The ESL Department Language Assistance Center WILL be available to make phone calls home to parents and students as needed (buildings that have bi-lingual instructional assistants will be available to support with calls etc.)
- Bi-lingual instructional assistants and the Language Assistance Center will provide support to EL students navigating Chromebook operation (if necessary)
- Bi-lingual instructional assistants will be available to support instruction to EL students asynchronously using the supplemental resources outlined in the district plan (if necessary)
- Translation of documents needed by the Communications Department will continue uninterrupted
- Phone Dialers in our top (5) languages will continue through the ESL Department as deemed necessary by Communications

If you have any questions please feel free to reach out to me or contact our Language Assistance Center at the numbers below. Spanish - 365-5118

- Somali - 365-8972
 - Nepali - 365-3105
 - Arabic - 365-6920
 - French - 365-5327

Math Games to Encourage Logic and Numeracy

Make the Most of it

Remove kings and jacks from the deck. Ace is one and Queen is zero. Players take turns drawing one card at a time, trying to create the largest 5-digit number possible. As each card is drawn it is placed (and cannot be moved) into the ones, tens, hundreds, thousands, or ten-thousands place. When the sixth card is drawn, the player can choose one of the cards on the table to discard and replace it with the sixth card. Largest 5 digit number wins. Make this game easier or harder by varying the number of digits.

Make 100

In this game Aces are one, Queens are zero, and Kings and Jacks are wild cards. Each game has 5 rounds. To play, deal six cards to each player. Players choose any four of the cards to make two double-digit numbers that when added come as close as possible to the total of 100. Wild cards can be assigned any value. Players record their numbers and the sums on the score sheet. The player's score for each round is the difference between the sum and 100 (for example sums of 95 and 105 both score 5 points). The used cards are discarded and the two cards remaining in each hand are kept for the next round. For rounds 2 to 5, deal out four

cards to each player and make two double-digit numbers, add them, and score your points. At the end of five rounds, the player with the lowest value wins.

- Scoring variation: Play is the same, but when you score use positive numbers for sums above 100 and negative numbers for scores below 100. The player then adds up positive and negative numbers and the one with the grand total closest to zero after five rounds wins.

NIM

Place the pile of tokens (pebbles, toothpicks, beans, pennies, dry cereal, etc.) on the table between two players. Allow the youngest player choice of moving first or second; in succeeding games, allow the loser of the last game to choose. On your turn, remove one or two tokens from the pile. You must take at least one token on your turn, but you may not take more than two. Whoever takes the last token is the winner.

Variations:

- Change the number of tokens in the starting pile.
- Allow players to take one, two, or three tokens per turn.
- Make the last token “poison.” Whoever takes it loses the game.
