A Day at the Fort:

AM: Short lesson in class followed by an interactive shop time in a state-of-the-art wood shop. Students have choices of many projects and opportunities to visit job sites to experience the trade in the field.

PM: Start with a quick lesson in class. We will develop skills to prepare you to be employable in a variety of employment opportunities with NCCER certifications that will allow you to work throughout the country.

About US:

The carpentry Lab is full of opportunity to learn about all aspects of the field of carpentry. We have a lab full of up-to-date tools in the industry. Including a CNC router, resaw band saw, surface planer and a large variety of power tools you will be using to build what you can dream!

Things You'll Do:

- You will build Storage Sheds
- You will learn to install finish trim
- You will install siding and roofing products
- You will gain knowledge of finish flooring and drywall and installation
- You will have experience in reading blueprints
