

Columbus City Schools, OH 2025-26 Broadleigh ES Realignment Process

Options Analysis 10/08/2025

Cropper GIS

2025-26 Capacity, Official Enrollment and Building Utilizations

The following document contains a series of tables that depict statistics for current schools and boundaries that are being evaluated. This information will help inform all stakeholders on how schools could be potentially impacted as a result of potential realignment adjustments. The current student enrollment numbers were derived from the district's September, 2025 student database.

Glossary of Terms

Capacity –the number of students that an individual school has the physical capacity to enroll and can be reasonably accommodated in a facility.

Utilization - Utilization is the total enrollment divided by the capacity, described as a percentage.

Utilization Color Key
Within $\pm 10\%$ of Study Area Average
Between $\pm 10-15\%$ from Study Area Average
Greater than $\pm 15\%$ from Study Area Average

Live and Attend In students – Students residing inside of a school attendance boundary and attending that zoned school.

Out of Study Area students – Students that live outside of the study area but within CCS District's boundary.

Out of District students – Students that live outside CCS District's boundary.

Unmatched students – Students whose address could not be located in our GIS software.

Feeder Pattern – The number of students living within the attendance boundary of both a lower grade cohort (ex. Elementary schools) and a higher-grade cohort (i.e., Middle School). This is given as a percentage of Live-In students.

Enrollment and Utilization Tables

The following tables show current utilization by percentage based on current enrollment and 2025-26 building capacity, compared to estimated enrollment and utilization for the options. Student counts are based on the September 2025 Columbus City Schools District student database. Elementary DRAFT Options A and B are presented along with current enrollment statistics. An additional DRAFT Option has been removed from consideration after extensive input from the Internal Planning Team and Public Advisory Committee. A middle school and high school DRAFT Option has been prepared that aligns with both elementary DRAFT options.

Methodology: For elementary schools, East Columbus, Eastgate, and Fairmoor students living in and attending in a given school zone were moved in each option along with the boundary changes. All other students in these zones were assumed to remain at their current school of attendance. All Broadleigh students were moved with the boundary changes. Students attending Broadleigh from outside of the Broadleigh zone were assumed to return to their home schools. This means that current enrollment numbers and enrollment estimates in the elementary options will differ, as the Broadleigh students attending from out of zone are not being counted in the options. For middle and high schools, students living in and attending in each zone were moved with the boundaries, and all other students were assumed to remain at their current school of attendance.

Feeder Patterns

The tables below show the progression students follow from one grade cohort to the next by the percentage of students moving from each given lower grade cohort school to each given higher grade cohort school.

Option	ES to MS Splits	MS to HS Splits	Total Splits
Current	0	0	0
DRAFT Options	0	0	0

*This table highlights the total splits that exist in each boundary configuration. A split occurs when the progression of students from one ES feeds into 2 or more MS.
